Bark ATL's bathing and shampoo add-ons help tailor the experience for your pet and lifestyle. We carry a diverse selection of shampoos and conditioners, therefore we hand-select the best product for your pet based on their coat and skin type to achieve the best results. Our professional pet groomers customize each bathing service to suit the unique needs, appearance and personality of your pup. Different shampoo regiments include:

### **Hypoallergenic**

This is for dogs with sensitive skin. It is a very mild shampoo that has small chances of irritating your dog's skin. It helps to avoid skin issues and keeps your dog's coat looking nice and clean. This is a good choice if your dog is subject to skin allergies or irritations.

### **Peppermint/Aloe Vera**

This shampoo is great for soothing and cooling the coat and skin. It's a very gentle ingredient that is also good for dogs with sensitive skin. Peppermint and aloe vera have been used for centuries to help with various skin issues. It helps relieve skin irritations and promotes healing.

### **Oatmeal**

Moisturizes dry, itchy sensitive skin.

### **Whitening/Black Shampoo**

Used for dogs with black or white coats. It brings out the color and makes your dog's fur look shiny and healthy!

### **MicroTek**

Helps with biting, licking and scratching. Soothes hot spots and dry skin and removes pet odor.

### **Flea Shampoo**

If your dog is prone to fleas, then a flea shampoo will terminate fleas instantly. You will have to follow up with a flea-preventative solution three days after a flea bath is applied. Please note that although flea shampoos are great at removing fleas and providing much-needed relief, they do not prevent dogs from getting fleas again in the future.

### **Medicated**

Your vet might prescribe your dog a special medicated shampoo that will help them with specific skin conditions.

### **Degrease**

Cuts through dirt and grease to achieve a deep, gentle clean. It's a fast and easy way to clean greasy ears, oily coats, and dogs who may have a coat that is grimmer than usual.

### **Deodorizing**

Odor Eliminator Shampoo is crafted to break down odors on a molecular level, leaving the coat smelling fresh. It gently cleans, conditions, and enriches the skin and coat.

### **Shedding**

Helps reduce shedding and protect against excessive shedding leaving a healthy and shiny coat.
